

# Using MTA To Place a Food Truck

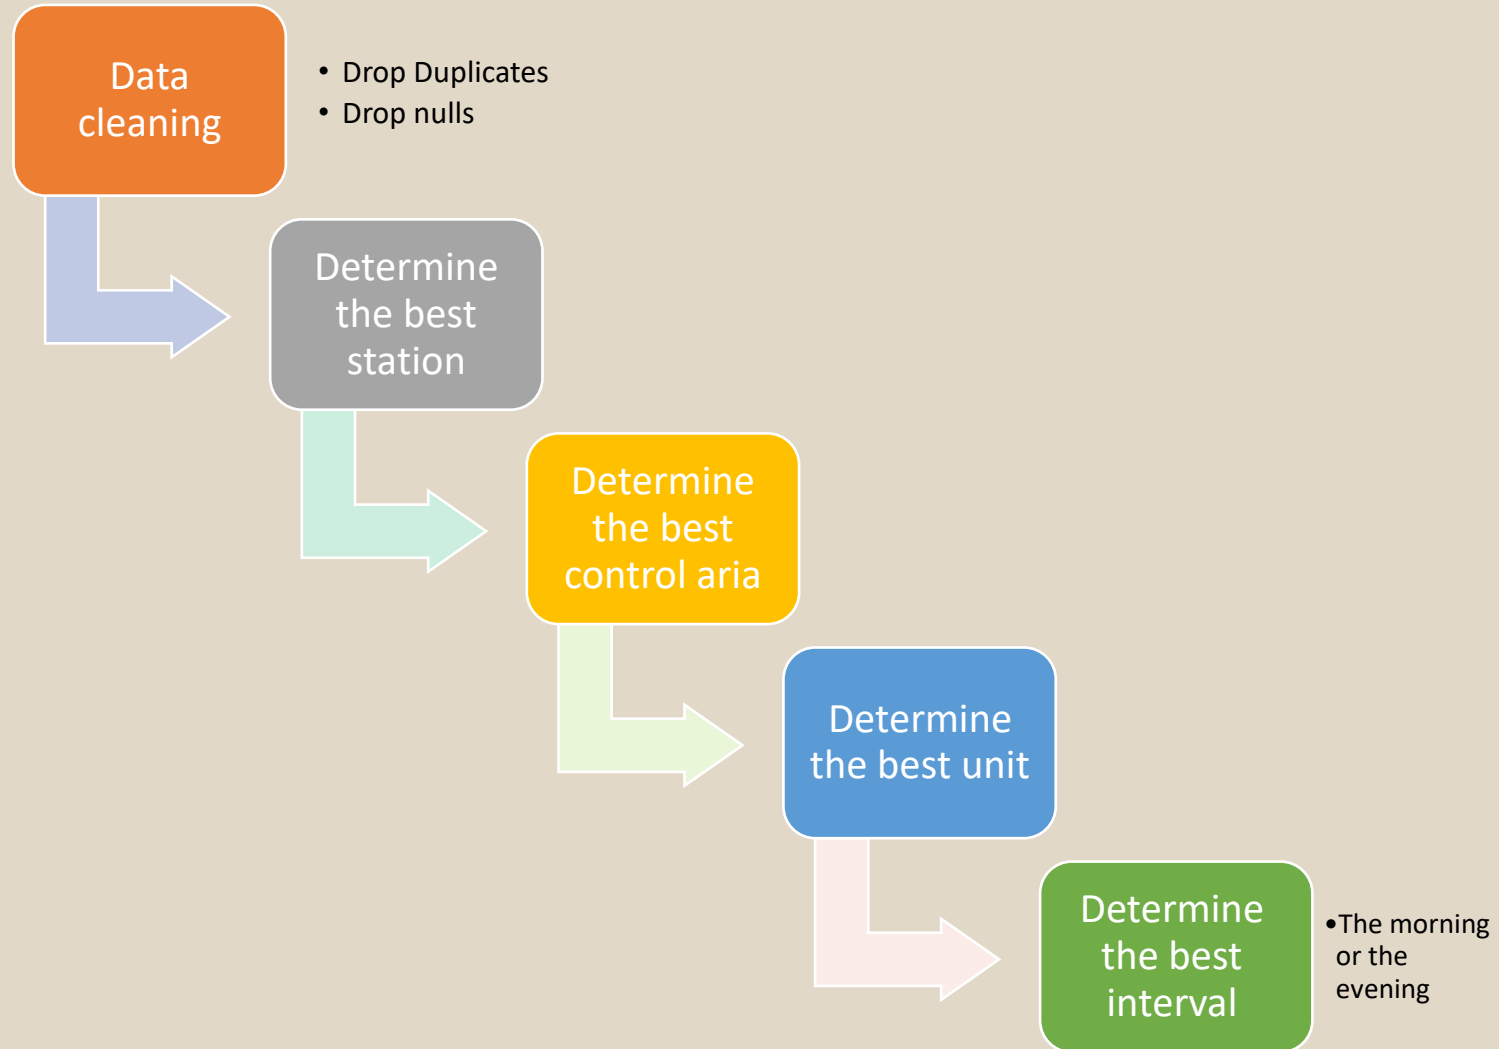

Dimah Abdulrahman Albunayyih

# Backstory :

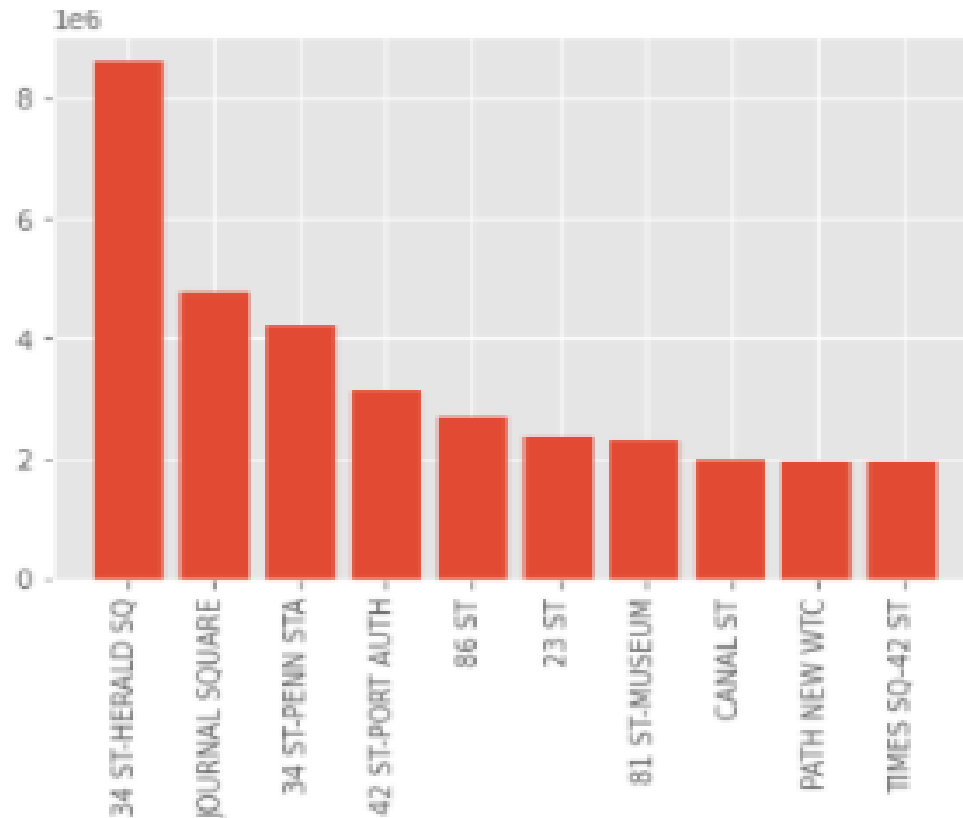

my client He has a Food Truck, He wants to place it beside the best station and control aria and the best interval morning or evening. Also, he wants to put an announcement beside the best unit in that control Aria. He hired me to so.

# My plan

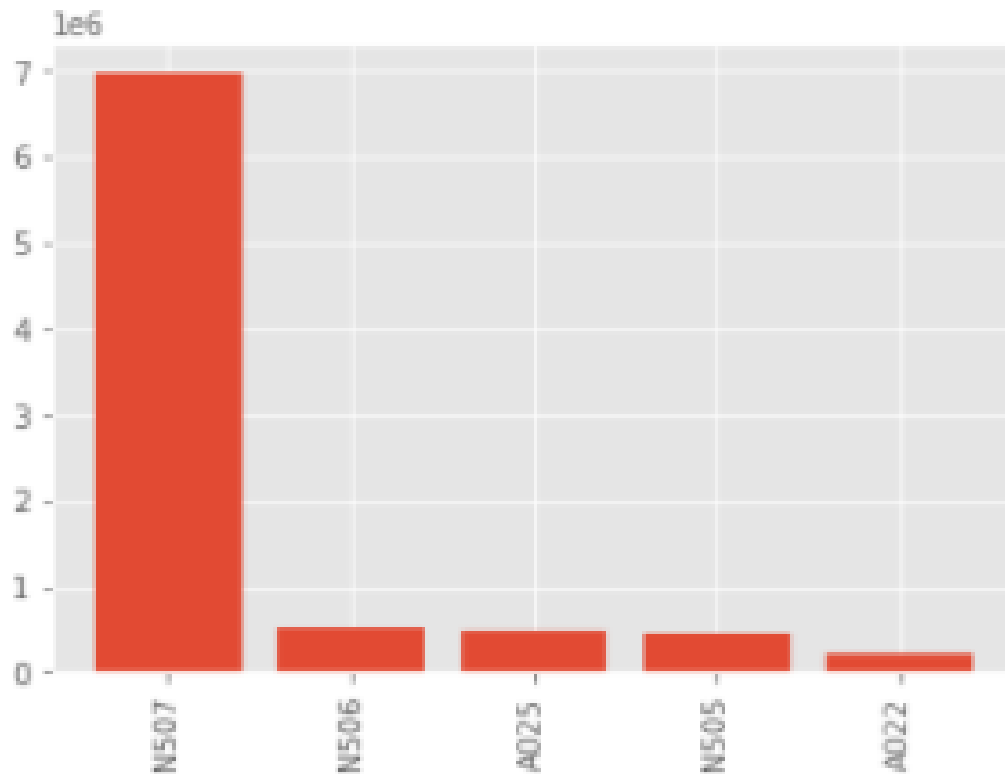

# The busiest station in MTA:

---

The busiest C\A in MTA where STATION= 34 ST-HERALD SQ:

---

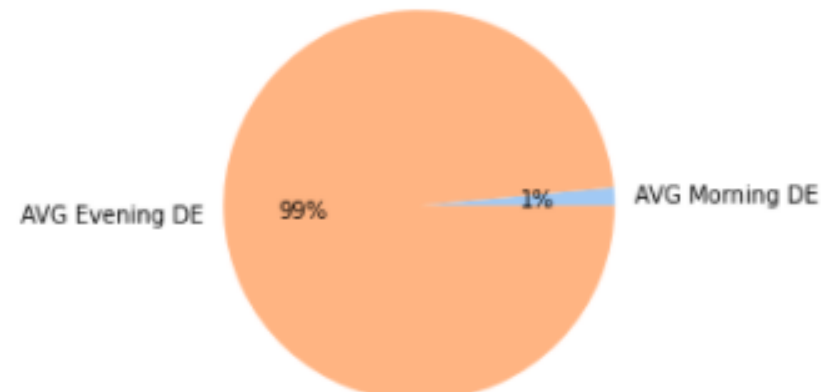

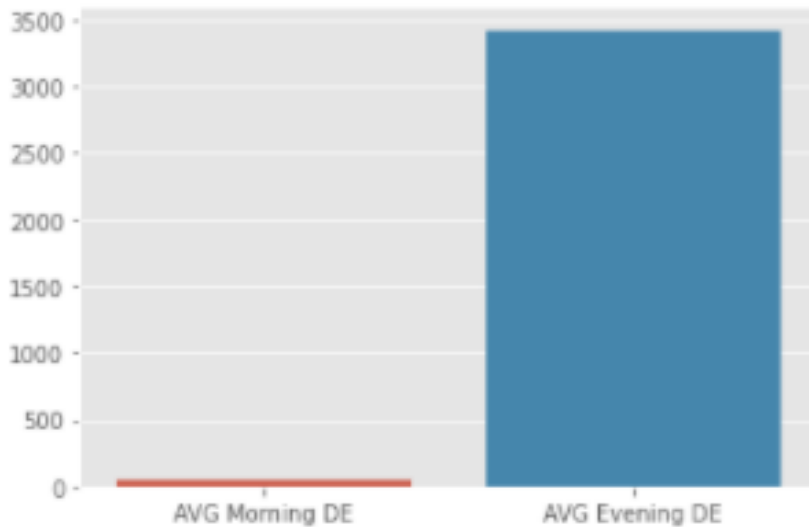

The busiest UNIT Where C\A = N507:

	UNIT	sum(DAILY_ENTRIES)
0	R023	6970491.0

# The Average of Daily Entries in morning and evening interval:

---

# Conclusion:

At the end, I determined the best control area for the food truck after EDA, the best interval which is the evening, and the best unit for the announcement.

Thank you
